

# THE UNGUATOR

## A CONTEMPORARY ELECTRONIC MORTAR AND PESTLE

Save time and money while increasing the efficiency of your compounding practice with the Unguator<sup>®</sup>, a device developed to facilitate the mixing process. With its multiple applications, it can be used to: enhance accurate metered dosing by ensuring the consistency of semi-solid mixtures; reduce particle size making extemporaneous preparations smoother and pharmaceutically elegant, and; improve percutaneous absorption and subsequent therapeutic outcomes. The Unguator's variably sized mixing containers can also be used to dispense batches, saving you even more time and money. Large mixing containers allow for batch preparations, while connecting devices make for quick, easy batch-to-dispensing container transfers.

### THE UNGUATOR 2100<sup>®</sup> MODEL

- Programmable mixing parameters; permanent entry ✓
- Preset mixing programs ✓
- Large user friendly digital display field ✓
- Quieter mixing operations ✓
- USB Port for software integration and record keeping ✓
- Mixing speed range: 120rpm–3000rpm ✓
- Accommodates jar sizes ranging from 15mL–1000mL ✓

### THE UNGUATOR E/S<sup>®</sup> MODEL

- Programmable mixing parameters; manual entry ✓
- Variable mixing time and speed ✓
- Digital display field ✓
- Automatic jar oscillation ✓
- Automatic free spin mode ✓
- Hands free operation ✓
- Accommodates jar sizes ranging from 15mL–500mL ✓
